Table 27--U.S. agricultural exports and imports by commodity groups, October-September 1974-77 .....	333
---	-----

\* \* \* \* \*  
 \*  
 \* Because of the change in the fiscal year from July 1 through \*  
 \* June 30 to October 1 through September 30, all historical \*  
 \* tables in this report refer to fiscal October-September years. \*  
 \* Fiscal year 1977 statistics are therefore compared with October \*  
 \* 1975-September 1976 data. Longer term series have also been \*  
 \* converted to October-September years. \*  
 \*

## SPECIAL NOTICE

This publication is a statistical reference for U.S. trade in agricultural products. Detailed commodity and country tables show exports and imports for the most recent 2-year period. In addition, historical series are presented for the major commodities and commodity groups.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture, such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Bureau.

### Exports

The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics, but are reflected in nonagricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; and under P.L. 87-195 (Act for International Development). Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination, or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form.

Agricultural exports under specified government financed programs (table 10) include shipments under programs authorized by Public Laws 83-480, 87-165, 665, and 195. Commercial exports include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit guarantees for relatively short periods repayable in dollars plus interest by USDA's Commodity Credit Corporation, and Export-Import Bank loans and medium-term loan guarantees; (2) sales of government owned commodities at less than domestic market prices; and (3) export payment assistance.

Apparent excesses of exports under specified Government programs over total exports, which result in negative values in the column "Agricultural exports outside specified Government programs," may be due to lags in reporting, differences in valuation procedures, or the recording of the export as destined for the country through which transshipment was made.

For certain commodities, referred to as Special Category commodities, security restrictions prevent the release of country of destination information.

Commodity-by-country data (table 11) are printed at the 7-digit Schedule B commodity code level. Statistics on commodities valued under \$1 million are not shown, but are available for reference from Agricultural Specialist machine tabulations in the Statistics Program Area, Foreign Demand and Competition Division, Economics, Statistics, and Cooperatives Service, U.S. Department of Agriculture. So-called "basket" classifications (28 commodities) were excluded because they consist of diverse items and do not provide for analytical clarity. Countries listed under commodity headings were selected on a percentage of commodity export values as follows:

(1) Commodities having an export value from \$1 million to \$5 million show countries accounting for 5 percent or more; (2) Commodities with export value from \$5 to \$20 million show countries accounting for 2 percent or more; (3) Commodities with export value of \$20 to \$50 million show countries accounting for 1 percent or more; and (4) Commodities valued over \$50 million show countries accounting for 0.3 percent or more. The value of commodities to selected countries was subtracted from each commodity total to derive "other countries."

Because of transshipments, U.S. exports to some countries such as the Netherlands, Belgium, and West Germany are overstated. In addition, substantial amounts of grains and oilseeds shipped through certain Canadian ports are designated as exports to "unidentified" countries. Consequently, exports to many destinations are understated in the country and commodity tables. Adjustments can be made to commodity-by-country and country-by-commodity data with information shown in table 26 on page 329. Both volume and value estimates are provided, based on differences between U.S. exports and recipient countries' import statistics. Transshipped U.S. grain by destination is determined from reports issued by the Canadian Grain Commission.

Country-by-commodity data (table 12) cover countries having agricultural export trade totals of \$1 million or more. The value of commodities exported to each country was summed and listed for the country at a 5-digit Schedule B level if the commodity total was 0.5 percent or more of agricultural exports to that country, with the following exceptions: Commodities to Canada, United Kingdom, the Netherlands, France, the Federal Republic of Germany (West Germany), and Japan were listed if they accounted for 0.1 percent or more, and commodities exported to Mexico, Belgium and Luxembourg, Italy, and the Philippines were listed if they accounted for 0.2 percent or more. The value of selected commodities was subtracted from each country total to derive "other agricultural products."

In commodity group-by-country data (table 14), 7-digit Schedule B commodity codes were summed to group totals. Each of the countries listed under each group accounted for 0.3 percent or more of the commodity group's export value with the following exception: Wheat, rice, feed grains, grains and preparations, corn, wheat and wheat products, grain sorghums, wheat and wheat flour, feed grains and products, and nonfat dry milk were listed if they accounted for 0.1 percent or more.

### Imports

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in non-agricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.

Commodity-by-country data (table 21) are printed at the 7-digit Schedule A commodity code level. Basket classifications (31 commodities) were excluded. Countries listed under commodity headings were based on a percentage of commodity import values as follows: (1) Commodities having an import value from \$1 million to \$5 million show countries accounting for 5 percent or more; (2) Commodities with import value from \$5 to \$20 million show countries accounting for 2 percent or more; (3) Commodities with import value of \$20 to \$50 million show countries accounting for 1 percent or more; and (4) Commodities valued over \$50 million show countries accounting for 0.3 percent or more. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

Country-by-commodity data (table 22) cover countries accounting for import totals of \$1 million or more. The value of commodities imported from each country was summed and listed for the country of origin at a 5-digit Schedule A level if the commodity total was 0.3 percent or more of the agricultural imports from that country, with the following exceptions: Commodities from Canada, Mexico, Brazil, Argentina, and Australia are listed if they account for 0.1 percent or more. Value of selected commodities was subtracted from each country total to derive "other agricultural products."

In commodity group-by-country data (table 24), 7-digit TSUSA commodity codes were summed to group totals. Countries listed under each group accounted for 0.3 percent or more of the commodity group's import value with the following exception: Bananas and plantains, green coffee, cocoa beans, crude rubber, pork, and raw sugar were listed if they accounted for 0.1 percent or more.

Abbreviations for units of quantity and commodities

Abbreviation	Description	Abbreviation	Description
ADV	Advanced	MLB	Thousand pounds
ALC	Alcohol	MLD	Milled
AOZ	Avoirdupois ounces	MNO	Thousand number
B	Breeding	MO	Month
B/FAT	Butterfat	MRB	Thousand running bales
BEV	Beverages	MT	Metric tons (2,204.622 pounds)
BR	Brine	MTRLs	Materials
BU	Bushel	MXD	Mixed
BU EQ	Bushel equivalent	N/	Not
CAP	Capsules	N/O	Not over
CERT	Certified	N/R	Not for relief
CHEM	Chemical	N/S	Not stemmed
CIG	Cigarette	NA	Not available
CLB	Clean pound	NAT	Natural
CND	Canned	NEC	Not elsewhere classified
COLOR	Colored	NES	Not elsewhere specified
CONC	Concentrated, concentrates	NO	Number
COND	Condensed	NSPF	Not specifically provided for

COMECON .....	1,646,417	413	1,646,004

1/ The fiscal year is now on an October-September basis. No comparison will be made for 1976.

2/ Negative values in the "commercial" column indicate excess of government programs over total exports attributed to reporting lags or classification differences.

3/ Transshipments through Canadian-St. Lawrence ports.
